

# New Actemium projects

It involves the installation of charging points for electric cars and the construction of electric cabinets for a food logistics company.

Actemium has installed charging points for electric vehicles at [Configure cookies](#) PSA Group dealerships. The project for **Total Gas y Electricidad**, worth €140,000, was completed at the end of January, and consisted of the electrical installation, civil works, start-up, commissioning and implementation of the authentication project in the facilities that require it. The CPs have been installed in the different areas of the dealership: workshop, preparation, demonstration and delivery.

For **Viastore System**, a company dedicated to the implementation of logistics systems for distributors of all types of products, **Actemium** has built two power and control electrical cabinets. The project includes tray assembly, cable routing, connection and commissioning of the conveyor system for the logistics distribution of the product, in the sub-zero warehouse of **Cárnicas Cinco Villas**, in Ejea de los Caballeros, Zaragoza province.
