

Omexom: a team of champions

The incorporation of Sistem Melesur Energía and Sistem Infraestructuras y Operaciones EPC into VINCI Energies Spain, within the Omexom brand, is a milestone for the Group.

With the acquisition of both, **VINCI Energies Spain** becomes one of the main players in the market for electricity production, transport, transformation and

distribution services in Spain. “Sistem”, explains **Francisco**

Morilla, Director of Operations and Maintenance at Omexom, “is dedicated to all energy activity and to the turnkey projects of facilities and renewables. Within the energy sector, it has the full range of voltages, High, Medium and Low, ranging from generation, with renewables, to distribution, transport, substations, etc. We cover all ranges, from generation to the final customer, with the installation of the meter of the company we work with”.

The incorporation of Sistem makes Omexom a primary actor within the spanish market

With this incorporation, **Omexom** increases its power and capacity within a highly competitive market, expanding its customer portfolio in Spain, both in the public services sector and in small and medium-sized companies. As **Laurent Clech, General Director of VINCI Energies Spain** explains, “in recent years, **Sistem** has become a benchmark in engineering, installation and maintenance of electrical networks and substations. These acquisitions will benefit our customers thanks to our greater capabilities in these fields and the full coverage of the national territory. In addition, the complementarity of the solutions and services of **Sistem** and **VINCI Energies** will allow us to accompany our customers in the digitalisation of their networks”.

The jump is significant, both qualitatively and quantitatively. With this new integration, **VINCI Energies** will generate annual revenues in Spain of close to 400 million euros and will employ 3,500 people, which is almost double the size of the Group. The possibilities of generating collaborations and synergies with other brands have multiplied.
