

Substation and lighting maintenance

Several of the brand's business units have renewed important maintenance contracts

The **Omexom Baleares** business unit has renewed its Substation Maintenance Brigade contact with **Red Eléctrica de España (REE)**, for the Balearic Islands until 2022, worth in excess of €3M, whilst **Omexom Cantabria Subestaciones** has been awarded another Substation Maintenance Brigade 3-year framework contract by **REE**, which in this case covers the Red Eléctrica northern sector from Cantabria to Aragón, worth over €3M. In both cases, the contracts cover the maintenance and operation of all REE substations in the aforementioned areas.

Omexom, via the **Omexom Cantabria Línea** business unit, has also become one of the six awardee companies under the Plan anual 2019 de tendido y sustitución de fibra óptica [2019 Annual stringing and fibre optic replacement plan] for **REE**. The Omexom Framework Contract, valued at €2M, covers 15 interventions in the following areas: 2 in Central, 2 in East, 4 in West, 5 in North and 2 in South. The first to be implemented involved the stringing of a 400 kV line between Guadame-Cabra, in Córdoba.

REE has also awarded **Omexom Ingeniería Bilbao** a two-year testing contract. This business unit has also been awarded a two-year contract, renewable for another two years and valued at €130,000, for basic engineering services and bidding by **EDP**.

The new **Zorrozaurre** island located on the right bank of the new Deusto canal, in Bilbao, now has its first public lighting contract. **Omexom Territories** has been awarded the contract, expected to last 8 months, and covering almost 2 linear kilometres of street and green zone lighting. LED lighting will be used for a total of 493 fixtures, with individual adjustment, already used by Omexom Territories for several big new areas in Bilbao, such as Sabino Arana and Avenida Díaz Enparantza.

Lastly, on 1 March **Omexom Territories** started the public lighting works in **Getxo** under a temporary joint venture with a local company. The 3-year maintenance project currently covers 7,700 lighting fixtures, with a two-year renewal option.
