

Omexom

Experts in Generation and Transportation of Electrical Energy.

Omexom is the brand of VINCI Energies specialized in generation, transport, transformation and distribution of electrical energy.

Omexom offers a wide range of services related to engineering, construction and maintenance in the electrical energy sector, as well as in data processing and management, mechanical engineering, air treatment systems and public work projects.

Omexom acts as a partner of manufacturers, operators and owners of electrical grids and in the area of industrial facility management. It offers specific and customized solutions for classic projects as well as projects of extreme complexity and turnkey solutions.

Omexom, leading player with international presence, focused on future challenges in the energy sector and Smart Grids.

Omexom currently operates in more than 36 countries and is a reference in the Power & Grid sector thanks to its ability to offer services throughout the electric power generation and transmission chain. Omexom is immersed in the evolution of the energy sector and is one of the leading brands in the development and implementation of Smart Grids.

The Omexom network consists of more than 23.000 experts working in 425 business units and generating revenues of 4 billion euros.
